NOTICE

ASBESTOS HAZARD EMERGENCY RESPONSE ACT OF 1986 (AHERA)

Saint Matthew Catholic School, Indianapolis, of the Archdiocese of Indianapolis has complied with the EPA School Rule (1982) and AHERA (1986). The management plan for meeting the requirements of AHERA is available upon request in the school office.

The initial required inspection of this school was completed in January, 2008, by ACT, an accredited asbestos inspection company. The asbestos-containing building materials identified, if left undisturbed, do not present an immediate danger to building occupants. The following response actions and preventive measures have been taken in accordance with the Management Plan.

Remodeling of the school/parish kitchen area included removal of the kitchen floor mastic that contained asbestos. The mastic was properly abated during July, 2008.

Furthermore, periodic surveillance of asbestos-containing building materials is completed every six months to ensure that the materials are undisturbed and in good condition.

The building will be re-inspected by an accredited inspector every three years after the heretofore mentioned initial inspection of January, 2008, thus, the next complete inspection is scheduled for January, 2011.

I hereby certify that I have made the notifications required under AHERA.
